PUT YOUR FOCUS EXACTLY WHERE YOUR SCHOOL NEEDS IT.

POWERSCHOOL SIS SUPPORT

When navigating the complex world of K-12 education, schools are charged with the daunting task of managing data systems and school operations while trying to remain equally committed to providing students with a quality education. This feat can prove to be quite challenging, but TeamingSolution for Education is here to help you carry the load. With our years of experience, you will get a service you can trust from a technology partner who cares about the success of your school just as much as you do. Our customized service center support model eliminates the cost of hiring full-time specialists and allows educators to focus their time and resources on what's important; students.

We provide PowerSchool solutions in the areas of implementation, training, help desk support, customizations, integrations, master scheduling, and data dashboards designed specifically to meet the needs of your school.

IMPLEMENTATION

We have implemented a host of PowerSchool instances over the last few years. In the process, we've figured out the best way to streamline the PowerSchool implementation process and give each of our clients a custom-tailored instance of PowerSchool. We will never make you go through any tedious tasks or refer you to system documentation. When it comes to implementation, we do all the heavy lifting for you. Your PowerSchool gets set up according to how you want it. Hands on! That's our approach for implementation.

- Database Conversions (If Required)
- District Setup
- School Setup

- BlackBoard
- Illuminate Assessment
- Canvas
- SwiftK12

- Dean's List
- Clever
- School Pass
- Tableau
- MySchoolBucks
- NWEA
- Google Classroom
- And More!

MASTER SCHEDULING

While some school administrators look to education reformers for solutions for the "right" way to schedule a school day, their point is quite the opposite: the only "right" master schedule is one that takes into account the needs of students. Some schools may use master scheduling

to create more equitable access to rigorous courses, while others may experiment with block scheduling to create more time for support periods. Either way TeamingSolution can support you in the process. There are as many nontraditional approaches to scheduling as there are schools who need them.

DASHBOARDS

Our clients use our dashboards to quickly gain insights into the most important aspects of their data. Our real-time student data dashboards integrate information from enrollments, attendance, grade, assessments, learning tools, and other sources to provide compelling, comprehensive visual representations of student progress that give educators timely and actionable feedback about student learning to improve achievement and instructional practices.

STATE REPORTING

With each passing year, your data is becoming more and more critical to funding, accountability, compliance, and assessment functions. The necessity of submitting accurate data to your state board of education is vital to the success of your school. We understand the challenge of collecting and maintaining quality data. We also have years of experience and an expert in your state who will guide you to state reporting success.

Some of the state reporting systems we service include:

Texas (TSDS)   **Michigan (MSDS)**   **Illinois (IWAS)**

Tennessee (EIS)

District of Columbia (SLED)

South Carolina (MTSS)
